Tags

1. Update using the executable file (generate_html.exe)

Your folder hierarchy should be like this:

```
| Descriptions - Categories.tsv
| Descriptions - ressources.tsv
| generate_html.exe
| generate_html.py
| index.html
| index_fr.html
| position_computation.js
| style.css
|
+---font
|   KGLifeisMessy.ttf
|   SuisseIntl-Light.otf
|   SuisseIntl-LightItalic.otf
|   SuisseIntl-Medium.otf
|   SuisseIntl-MediumItalic.otf
|
+---logo
|   amnesty_logo.png
|   apiculture.png
|   Apprendre.png
|   ...
```

1. Update spreadsheet accordingly
 - a. Spreadsheet Link:
https://docs.google.com/spreadsheets/d/151bXmRkepCBGJIqvU_9PvW9CF26srH7rbjgIxWSqOYg/edit#gid=0
 - b. Upload any new photos in the **logo** folder
2. Download the spreadsheet (**Descriptions - Categories.tsv**, **Descriptions - ressources.tsv**) to the parent folder
3. Run (double click) the **generate_html.exe** file

Update Manually

In the html file the ressources are arranged according to this schema :

(the capitalized underlined text is specified differently for every ressource)

```
<!-- RESSOURCE NAME -->
<div class="bubble smaller" id="resource1">
  <a href="<u>RESSOURCE LINK</u>">
    RESSOURCE NAME</u>">
  </a>
  <div class="text-description">
    <h3><u>RESSOURCE NAME</u></h3>
    <u>RESSOURCE DESCRIPTION</u>
  </div>
</div>

<!--#####-->
<!--Down below is an example-->
<!-- Resource 1: Semaine de la durabilité -->
<div class="bubble smaller" id="resource1">
  <a href="https://semaine-durable.unipoly.ch/">
    Semaine de la
durabilité</u>">
  </a>
  <div class="text-description">
    <h3><u>Semaine de la durabilité</u></h3>
    <u>Sustainability Week is the largest student sustainability project in Switzerland.
It takes place every spring semester on the UNILEPFL campus. It aims to raise
students' awareness of sustainability and ecological issues.</u>
  </div>
</div>
```

And the categories follow this schema :

```
<!-- CATEGORY NAME -->
<div class="bubble" id="bubble1">
  
  <span><u>CATEGORY NAME</u></span>
  <div class="border" id="border1"></div>
  .... ressources schema
</div>
```

So in order to modify or delete existing ressources, use ctrl+f to navigate to the code snippet representing that ressources, then delete the whole schema if you want to delete the ressources, or modify the relevant fields if you want to change something. The same goes for the Categories

If you want to manually add a resources then copy paste the resource schema in the relevant category and fill in all the underlined fields accordingly. Any images you want to display should be uploaded to the logo folder.
